## **IZM Nozzle Offer 2016**

Syngenta Ireland Ltd,  
Block 6, Cleaboy Business Park,  
Old Kilmeaden Road,  
Waterford

## For the 2016 barley fungicide spraying season, Syngenta is again offering the opportunity to claim free AMISTAR/Guardian Air drift-reducing nozzles.

Simply purchase BONTIMA, CEBARA or ZULU between 1st April 2016 and 31st July 2016 and submit the attached claim form to: IZM Nozzle Offer 2016, Syngenta Irl Ltd, Cleaboy Business Park, Old Kilmeaden Road, Waterford or email to [cropsales.ie@syngenta.com](mailto:cropsales.ie@syngenta.com)

This offer entitles the purchaser to claim one free nozzle (RRP **€4.35 per nozzle**) from the AMISTAR/Guardian Air range for every full rate hectare of the product purchased\*\*.

| Product | Pack size | Full label rate | Nozzle entitlement per pack |
|---------|-----------|-----------------|-----------------------------|
| BONTIMA | 5 litre   | 2.0 l/ha        | 2.5                         |
| CEBARA  | 5 litre   | 2.0 l/ha        | 2.5                         |
| ZULU    | 5 litre   | 1.0 l/ha        | 5                           |

\*\* will be rounded up to the nearest full nozzle for the total claim.

### Long-lasting disease control

Isoyrazam (IZM) is an SDHI-based fungicide offering a broad spectrum of disease control with resulting yield and quality improvements, on both winter and spring barley. The double-binding technology of IZM provides long-lasting protection and can be found in the well-established fungicide products BONTIMA, CEBARA and ZULU.

BONTIMA and CEBARA are co-formulations of IZM with cyprodinil, delivering a full spectrum of disease control at T1 and T2. ZULU is a straight IZM product for tank mixing with other fungicide products at T1 and T2.

#### IZM Nozzle Offer – Terms and Conditions

- This offer is open to farmers growing barley in the Republic of Ireland only
- Only purchases of the cereal fungicides BONTIMA, CEBARA and ZULU made between 1st April 2016 and 31st July 2016 are eligible for this offer
- Claims can only be made on the official claims form. No other claims will be accepted
- Incomplete claims will not be processed
- Closing date for receipt of claims is 30th September 2016. Claims received after this date will not be processed
- The nozzle offer applies to nozzles in the AMISTAR/Guardian Air range. No other nozzles can be substituted. There is no cash alternative
- Some sprayer models will require an adapter cap to fit these nozzles. These caps are not provided
- Syngenta reserve the right to audit claims and seek proof of purchase

### Drift-reducing nozzles

Drift-reducing nozzles deliver many benefits over standard nozzles

- Reduced loss of product into the environment
- More product delivered to the intended target
- Wider weather window of spray application

In addition many pesticide labels carry a mandatory buffer zone requirement to surface water. This buffer zone must be fully observed when using standard nozzles. Using approved drift-reducing nozzles, this buffer zone requirement may be reduced significantly.

Details on how buffer zones may be reduced are outlined in Department of Agriculture, Food and the Marine initiative STRIPE.

Drift-reducing nozzles are currently classified as 75% or 90% drift-reducing under STRIPE.

The AMISTAR/Guardian Air range of nozzles (based on air induction technology) are classified as 75% drift reducing nozzles under STRIPE and in many instances will allow for significant reduction in buffer zone requirement.

These nozzles are suitable for use on cereals between T0 and T3 timings inclusive.

Under this offer growers may choose from the range of nozzle sizes 02 to 05.
